Enterprise identities managed

EXECUTIVE PROPOSITION

Engineering depth. Executive perspective. Purpose-led leadership.

A leadership profile shaped by complex transformation, high-accountability delivery and a commitment to building technology systems that remain resilient, governable and worthy of trust.

01

STRATEGY & GOVERNANCE

Executive oversight, CAPEX discipline, decision structures and accountable delivery.

02

AI & CLOUD

Sovereign platforms, hybrid cloud, AI infrastructure and enterprise onboarding.

03

RESILIENCE & SECURITY

Cybersecurity, compliance, continuity, identity and mission-critical operations.

04

PURPOSE-LED INNOVATION

Original research and frameworks connecting governance, digital trust and individual resilience.

SELECTED IMPACT

Leadership in consequential environments

SOVEREIGN AI & CLOUD

National-scale platform leadership

Directed a SAR 550M sovereign AI cloud programme spanning Huawei Cloud Stack, NVIDIA DGX SuperPOD, Nutanix, Oracle Cloud Infrastructure and cloud federation.

PROGRAMME GOVERNANCE

Financial and executive control

Governed multi-vendor delivery, CAPEX, risk and executive reporting; re-engineered SAR 150M+ programmes into phased approval models.

MISSION-CRITICAL DELIVERY

Resilience under pressure

Delivered 100% uptime for FIFA World Cup 2022-related infrastructure environments and led continuity across complex enterprise operations.

ENTERPRISE TRANSFORMATION

Scalable organisational value

Led cloud, ERP, identity, cybersecurity and digital-platform initiatives, including SAR 10M+ documented savings through enterprise DMS implementation.

LEADERSHIP PORTFOLIO

From enterprise delivery to original governance frameworks

A concise overview of the experience, original work and professional foundation behind Towseef Ahmed’s strategic technology leadership profile.

EXECUTIVE EXPERIENCE

Career shaped by complexity and responsibility

NOV 2022 - JAN 2026 PROGRAMME MANAGER

NEOM & Dell Technologies · Saudi Arabia

- Directed the end-to-end build-out and governance of a strategically significant SAR 550M AI cloud programme.
- Led sovereign AI and cloud infrastructure across Huawei Cloud Stack, NVIDIA DGX SuperPOD, Nutanix, Oracle and hybrid-cloud environments.
- Owned executive reporting, financial governance, vendor performance, risk, compliance and operational continuity.

JUN 2014 - OCT 2022 IT PROJECT MANAGER | ACTING HEAD OF IT

Al Ali Engineering · Qatar

- Governed enterprise technology strategy and infrastructure across a diversified corporate group and national mega-project environments.
- Led mission-critical FIFA World Cup 2022-related IT operations, enterprise cloud integration, cybersecurity and resilience.
- Delivered SAR 10M+ savings through DMS implementation and supported secure operations for 5,000+ workforce.

2011 - 2018

ENGINEERING & TECHNOLOGY ENTREPRENEURSHIP

India · Concurrent early-career ventures

- Built technical foundations through full-stack engineering, digital platforms, cloud and network consulting.
- Co-founded and managed technology ventures serving B2B and SME clients while developing commercial and leadership experience.
